## Project Summary

**Company** : Fiserv India Pvt. Ltd., Pune

**Description** : Client is a Global Payment Technology Solutions Company headquartered in Atlanta, Georgia, United States. The company's STAR interbank network offers PIN-secured debit acceptance at ATM and retail locations. It is also a giant POS device and other associated parts seller in USA. Bolton Applications take care of the POS equipment order processing, fulfilment, shipping, invoicing, billing and sending reports to customers.

**Role** : Working as Sr. Associate on 50+ applications which are Rest & SOAP based API services, Web & Standalone. I have used Spring & Spring Boot as development framework and Spring JDBC as data Part. These API services help fetching information of warranty product info. Product addition in database using service call and calculation of Tax amount for a given warranty product based on the geographical area it belongs to.

Work in agile, Scrum and Kanban framework as an individual contributor Responsibilities include - Interaction with Business team in story grooming, reviewing story/acceptance criteria, requirements analysis, technical design, implementation, testing, documentation, code reviews, maintaining version control of code using Bitbucket and documentation.

**Platform** : Java 1.8, 11, Spring Boot, Spring JDBC, SOAP UI, Apache POI, Ant, Maven, Postman, Git, AngularJS, Quartz Scheduler

---

**Company** : Cognizant Technology Solutions India Pvt. Ltd. Kolkata

**Project Name** : D & B UK Global GTB/ RTB Project

**Description** : NIKE is a client-server system which gives the published information about the other companies to the clients. Nike holds data of Belgium, Netherlands and Luxemburg markets. It receives raw data from 3rd party vendors, Validates the information, Formats, Processes and Stores the data in the Nike DB and replicates to XMLDB and downstream applications. The data is pulled from these databases to fabricate and deliver the reports to the customers.

**Role** : I was responsible for application development from scratches for 15+ standalone apps, multiple enhancement requests and bug fixes of existing applications. Also, worked in Web App UI upgradations like forms creation, buttons using reusable components, introduction of new fields, creating export & import modules for reports etc.

**Platform** : Core Java, Spring Frame Work 3.1, Servlet 3.0, JSP 2.0, XSLT, Java J2EE, Apache POI
