WORK EXPERINCE

Android Application Developer (Trainee) 2021 – 2022
Newline Tech

- Developed a blockchain application for electronic currencies, displaying real-time prices.
- Utilized Java and Kotlin for native Android development, integrating Restful APIs for data retrieval.
- Collaborated with a team to implement features, perform code reviews, and ensure app quality.

Flutter Developer 2022 - 2023
Al-Buraq Information Technology

- Specialized in mobile app development using Flutter.
- Developed Quds radio v3 app with Flutter, Bloc/Cubit for state management, and API integration.

Courses and Certifications

- Clean Architecture in Flutter 3 (Arabic) on Udemy
- Computer Maintenance and Information Security (Al-Noor Center)

PROJECTS

Insulin Application for Diabetic Care

2021- 2022

- Developed an Android app using Java/Kotlin, Firebase for backend, and sensor integration.
- Implemented features for health data monitoring, medication reminders, glucose trend visualization.
- Ensured user privacy and collaboration with healthcare professionals.

Beauty Haven App (Cross-Platform)

2022 - 2023

- Developed cross-platform Flutter app for Android and iOS.
- Utilized Firebase Firestore, Firebase Authentication, and Firebase Cloud Messaging.
- Implemented salon management, product ordering, appointment booking, and exclusive offers.

Quds radio v3 App (Cross-Platform)

2022 - 2023

- Developed Flutter app with Bloc/Cubit for state management and API integration.
- Supported live streaming, audio management, news updates for Android and iOS.
- Integrated Firebase notifications and analytics for enhanced user engagement.
- Upload in Google Play [Linke](#)

Blockchain App

2021 - 2022

- Developed a blockchain app for electronic currencies using Java and MVVM architecture.
- Utilized APIs to display current prices, set price alarms for specific currencies, and fetch the latest news and reports on the blockchain market.
- Prioritized security and user-friendly design.
