Software Test Engineer with 5 years of experience in automated and functional testing using Cypress, Selenium, and Postman. Proven track record in delivering high-quality software across e-commerce, healthcare, and supply chain. Passionate about quality assurance and continuous improvement.

## 📁 Professional Experience

### Software Testing Engineer, *GeekyAnts India Pvt. Ltd.*

04/2021 – 08/2023  
Bengaluru, India

- Developed and executed over 500 automated test scripts using Cypress, leading to a 40% reduction in manual testing time and a 30% increase in test coverage. This efficiency boost ensured more reliable and faster software releases.
- Actively participated in bug triage calls, providing valuable insights that accelerated the bug resolution process. This initiative improved team collaboration and reduced project delivery timelines by 15%.
- Played a key role in delivering high-quality software for clients in e-commerce, healthcare, and supply chain sectors. Consistently met and exceeded client expectations through rigorous testing and proactive issue resolution.

### Test Engineer, *MMADApps India Pvt. Ltd.*

11/2018 – 02/2021  
Bengaluru, India

- Automated testing processes using Selenium, resulting in a 50% improvement in testing efficiency and accuracy. This automation was crucial in maintaining high standards of software quality.
- Developed and implemented over 200 comprehensive test cases, ensuring robust and reliable software functionality. This effort led to a 25% decrease in post-release defects, enhancing customer satisfaction.
- Worked closely with team members to report and track bugs using Azure DevOps, ensuring timely resolution and optimal software performance. This collaboration was vital for successful project completions.

## 🧠 Skills

**Test Management**

### Tools

JIRA(Agile), Zephyr(Test Case)

**Cypress**

**Functional Testing**

Smoke Testing, Regression Testing, Ad-hoc Testing,

**JavaScript**

## Projects

---

### **Data Decision Platform v6.5, Endlink, Inc**

- **Contributions:** Spearheaded the testing of SMS, MMS, voice, email, and secure messaging functionalities, ensuring accurate data gathering and campaign management.
- **Impact:** Enhanced communication and data management within the health sector, directly improving the efficiency and effectiveness of patient outreach programs.
- **Results:** Delivered a reliable platform that significantly improved data-driven decision making for the client, leading to more targeted and successful health campaigns

### **Stipe Mirakl Optimization, Stripe, Inc**

- **Contributions:** Designed and executed comprehensive test plans in response to new UK regulatory requirements, ensuring operators handled taxes accurately and in compliance with regulations.
- **Impact:** Strengthened the client's regulatory compliance and financial accuracy, reducing the risk of legal issues and enhancing trust with stakeholders.
- **Results:** Successfully mitigated potential financial discrepancies, ensuring a smooth transition to the new regulatory framework.

### **APQP & RFQ Modules : Basecamp, Rivian Automotive, Inc**

- **Contributions:** Led the testing efforts for critical automotive supply chain applications, focusing on the Advanced Product Quality Planning (APQP) and Request for Quotation (RFQ) modules.
- **Impact:** Facilitated systematic approvals for the Start of Production (SOP) and streamlined supplier communication, leading to more efficient RFQ submissions and production workflows.
- **Results:** Improved supplier relationships and ensured timely delivery of automotive components, contributing to the overall success of the production process.

### **Program Implementation Plan (PIP), SAATHII**

Developed a robust, user-friendly, and scalable PIP software for nationwide rollout across Indian states and Union Territories, improving budgeting, planning, and approval processes.

### **iPAY, Indian Railway Catering & Tourism Corporation Ltd.**

Managed testing for IRCTC iPay, enhancing online digital payment convenience for railway passengers. This project improved the user experience for millions of travelers.
