🎓 EDUCATION

B.Tech Artificial Intelligence and Data Science
Zion Matriculation Higher Secondary School 📍
Chennai, India
Bachelor of Technology (B.Tech 📍) in Artificial Intelligence & Data Science Anna University (2023 – Present)
• Currently in **4th semester** under the **2021 regulation** syllabus.
• Consistently a **top-performing student** in academics.
• Developing expertise in **Python, Computer Networking, Machine Learning, and Data Science.**

📜 CERTIFICATES

- Prompt Engineering Bootcamp
- Cyber Security For Beginners
- Advanced Diploma in Python Programming
- ChatGPT for Beginners

🧩 INTERESTS

Learning New Technologies

Exploring AI & Cybersecurity
• Staying updated on AI models
• Cybersecurity Trends

Participating in Hackathons

- Building projects under time constraints

🧠 SKILLS

- Artificial Intelligence & Machine Learning** ● ● ● ● ●
- AI concepts
 - Prompt Engineering
- Robotic Process Automation** ● ● ● ● ●
- Data entry
 - Customer service
- Data Science & Analytics** ● ● ● ● ●
- Python
 - Data Visualization
 - Problem-Solving
- Network** ● ● ● ● ●
- API
 - Performance Tuning

👤 PROFILE

Relentless **AI strategist** with a mission to redefine machine perception and cognitive control. Built a custom **AI LLM** ("Jarvis") and engineered smart chatbot systems optimized for multimodal learning. Backed by **60+ global certifications** across **IBM, Google, Cisco, Oracle, UiPath**, and **IITM Data Science diploma**. Known for tactical learning speed, reality-defying execution, and **vision-centric AI architecture**. Fluent in four languages and driven by innovation, precision, and relentless self-upgradation.

🧩 PROFESSIONAL SKILLS

- Multimodal AI Architecture (Vision, Language)
- Custom LLM Design & Deployment (Jarvis)
- AI Chatbot Engineering & NLP Frameworks
- Prompt Engineering & Cognitive UX Design
- REST APIs, OpenAI/LLM API Integration
- Git, GitHub, Shell Scripting
- Continuous Learning & Certification Strategy
- Strategic Thinking, Leadership, and Mentoring

PROJECTS

1. JARVIS – Custom AI Language Model [LLM] (2024-Present)

Role: Creator & Architect

Designed a lightweight LLM fine-tuned on academic, emotional, and strategic decision domains. Integrated multimodal input processing for voice, text, and logic-based inputs. Built cognitive scaffolding using neuro-symbolic approaches and REST API control. Scored 91% on benchmark task alignment and passed simulated AGI fusion tests.

2. AI Chatbot Ecosystem (2023)

Role: NLP Engineer

Developed intelligent chatbot agents using Hugging Face Transformers and DialogFlow. Customized user journeys based on real-time sentiment analysis and context memory. Deployed via Flask APIs and integrated with WhatsApp and web portals.

SOFT SKILLS & TRAITS

Leadership by Precision & Vision

Extreme Self-Discipline and Tactical Time Control

Multilingual & Emotion-Aware Communication

Rapid Learning Velocity & Execution Mastery

ORGANISATIONS

Founder of AI Execution Guild

– Leading a 16+ member community on advanced AI mastery. Developed "DARKFIRE CORE" –AI scheduling, and deep focus flow. Led college-wide tech training workshops on AI fundamentals and prompt engineering. –Served as strategist and community guide for junior AI aspirants.
05/2025 – present
