Jan 2022 – Mar 2022	Project Intern, <i>Signal Processing Interpretation and REpresentation (SPIRE) Laboratory, IISC BANGLORE.</i> ↗ Internship at Indian Institute of Science, Bangalore, India on the development of an Automatic Speech Recognition System for Kashmiri language

🧠 SKILLS

Programming in Python | Data Structures and Algorithms in Python | Web Development | C/C++
Machine learning and Data Science | Git/Github | Reasoning Skills

📁 PROJECTS

Wordle Clone [↗](#)

Wordle is a daily word game created by Josh Wardle, a Brooklyn-based software engineer who has developed something of a reputation as a crafter of interesting social experiments. Every day, the people of the internet are greeted with a fresh word puzzle that can only be solved — or not! — using a series of process-of-elimination clues.

I used Python language to build this Wordle clone which works in terminal.

🏆 ACHIEVEMENTS

SOLVED 450+ DSA questions online
