Copenhagen, DK

## EXPERIENCE

### Senior Full Stack Developer

#### Coloplast

05/2022 - 07/2024 Humlebæk, DK

<https://www.coloplast.com/>

Coloplast is a global leader in healthcare products and services, specializing in wound care, urology, continence, and ostomy care

- Enhanced web applications for the healthcare sector using modern web technologies such as React, Next.js, and TypeScript
- Worked closely with designers to improve user interfaces, contributing to a more intuitive user experience
- Implemented solutions to streamline API interactions, supporting seamless integration with third-party services
- Optimized application performance and scalability through code refactoring, database tuning, and load balancing strategies
- Participated in daily standups, sprint planning, and retrospectives, contributing to a collaborative agile environment
- Managed user stories and sprint backlogs, ensuring timely delivery of features and bug fixes

### Full Stack Developer

#### Helmes

04/2020 - 03/2022 Tallinn, Estonia

<https://www.helmes.com/>

Helmes is a leading software development company, delivering custom software solutions for various industries, including finance, telecom, and healthcare

- Developed and maintained client-facing applications using Python and Django, focusing on cross-browser compatibility and responsive design
- Led the development of cross-platform applications, overseeing projects from concept to deployment
- Utilized Agile and Scrum methodologies to ensure efficient project management and delivery
- Managed multiple code repositories, handling bug fixes, updates, and live deployments
- Ensured data protection and compliance with security measures like encryption and regular audits
- Enhanced project workflows and automated processes, improving overall development efficiency

### Frontend Developer

#### Shpock

08/2017 - 02/2020 Vienna, Austria

<https://www.shpock.com/>

Shpock is an innovative e-commerce platform that provides price comparison and shopping solutions for consumers across Europe

- Continuously enhanced e-commerce web applications for the retail industry, using React, React Native, and JavaScript to deliver a seamless shopping experience across devices
- Developed a mobile app with a shared codebase for iOS and Android, simplifying maintenance and updates
- Developed and optimized features that significantly improved user engagement and satisfaction
- Implemented A/B testing strategies to evaluate and enhance key features, driving higher conversion rates
- Developed custom components and reusable modules, reducing development time and improving maintainability
- Managed version control and code repositories, overseeing updates and ensuring the reliability of deployments

## SUMMARY

Skilled full stack developer with a strong record in delivering quality software solutions, proficient in both front-end and back-end development to create responsive, user-friendly web applications, and adept at quickly adapting to new technologies and challenges while staying updated on industry trends and best practices, ensuring a valuable contribution to any development project

## EDUCATION

### Bachelor's in computer science

#### Aalborg University

09/2014 - 06/2017 Aalborg, Denmark

## SKILLS

#### Frontend

React, React Native, Next.js, Vue.js, JavaScript, TypeScript

#### Backend

Node, Express, Nest, PHP, Laravel, Python, Django

#### Databases

Firebase, MongoDB, MySQL, PostgreSQL

#### Tools

Docker, AWS, Azure, GCP, Git

## STRENGTHS

#### Collaboration

Proven ability to work with diverse teams, ensuring smooth project progress through clear communication and shared goals

#### Innovative Thinker

Developed creative solutions and introduced new features that advanced project goals and improved user experience

#### Attention to Detail

Strong focus on quality and precision, ensuring that software is thoroughly tested and reliable

## LANGUAGES

#### English

Proficient
