📂 Projects

Semicolon Portfolio 🔗
(skills: nextjs, tailwindcss, firebase-database)
 Professional company portfolio website designed to showcase our services, projects, developments, insightful blogs, and client testimonials, reflecting our expertise and commitment to excellence.

You Cart
(skills: reactjs, redux-toolkit, metronic template, tailwindcss, bootstrap)
 It provides admin management of users, stores, and products, orders while giving store owners tools for order tracking, hours management, and managing products with categories, including adding and updating products. (Admin panel & Store panel)

ARBA Retail System
(skills: reactJs, tailwind css, redux-toolkit)
 business management system with features such as inventory and customer management, purchasing orders, and a user-friendly cash register like D-mart's bill desk. Configured system setups and managed admin tenancy for secure access.

Harcoskepzo (Fitness) 🔗
(skills: react.js, tailwind css, redux-toolkit, redux-persist)
 Fitness user panel that includes workout playlists with video modules and customizable recipe and diet plans. Users can add, update, and remove workout, recipe and diet plans through dedicated modules

Explain Life 🔗
(skills: ReactJs, tailwind css, redux-toolkit)
 Life insurance policy recommendation agent website with coverage calculation with NodeJS backend (Admin panel & User panel)

Fitness Administration Portal
(skills: reactJs, bootstrap, metronic template)
 Provide a fitness plan that includes workout videos, personalized calorie tracking, and dietary recommendations.

Skyline Technology Administration Portal
(skills: reactJs, bootstrap, metronic-template)
 Create an integrated administration portal for efficient client, engineer, and Sarine machine Management, facilitating seamless coordination of diamond repair services and timely resolution of upcoming complaints.

Read-it-out 🔗
(skills: ReactJs, tailwind css, redux-toolkit)
 A government library website offering a wide range of books in various formats, ensuring accessibility and availability to users.

3SquaresApp

(skills: reactJs, bootstrap)

Food delivery website by connecting users with a diverse selection of professional restaurants and providing seamless delivery services. (with User Site, Admin Panel, Corporate Panel and Provider Panel)

Special Days Administration Portal

(skills: reactJs, bootstrap, metronic-template)

website dedicated to commemorating special occasions, offering advanced reminder functionalities and personalized party invitations to ensure memorable and organized celebrations.

Unicorn-Ui

(skills: reactJs, bootstrap, metronic-template)

collection of premium UI design templates encompassing diverse topics, providing a paid facility for professionals seeking high-quality. (User panel & Admin Panel)

Pokii Game Admin

(skills: next.js, react.js, redux-toolkit, firebase database, recharts, tailwind css, Google Adsense APIs, google authentication)

manages Google AdSense reports, allowing admins to create subusers with tailored permissions. It also organizes site links into collections for streamlined access and reporting with graph.

Elocube

(skills: next.js, tailwind css, redux-toolkit)

This project organizes a collection of voice and music products, offering users a music player and an artist list similar to Spotify

Cricket Fantasy

(skills: react.js, tailwind css, redux-toolkit)

A cricket fantasy user panel where users can view matches, join contests, and build teams of 11 players with role-based validation. Each team must include all player roles, a captain, and vice-captain, with options to save, update, or remove teams per contest.

Easysell 🔗

(skills: react.js, tailwind css, shadcnUI, react query, socket.io)

Integrates AWS Seller Central with AI-generated fields for streamlined seller data management. It includes Super Admin functionality, Role-based routes, and Module access control. Users are assigned specific Sellers, restricting access to only those sellers for enhanced security and workflow efficiency. Content-manager module, similar to Amazon's A+ content module, is implemented for detailed product listings with a large schema.

Superworks Recruitment

(skills: nextjs, tailwindcss, react-query)

job application platform streamlines the job search with a job requirement list page displaying titles, detailed job pages, and a dynamic application form with customizable fields and robust validation, enhancing user experience for job seekers.

Mybrary

(skills: next.js, tailwind css, shadcnUI, react query, redux-toolkit)

Social platform for book lovers, built with Next.js and Tailwind CSS for fast, responsive performance. Users can explore book showcase with covers, detailed insights, and interactive reactions, while seamlessly engaging through integrated social feeds and follower tracking. The platform combines personal library management with community-driven discovery, creating a connected and engaging reading experience
