## Profile

---

Flutter developer with a year of experience in building responsive apps. Skilled in UI/UX design, state management, and Firebase integration.

## Education

---

**BTech CSE**, SRM Institute of Science and Technology (2022 - 2026)

CGPA: 8.4, Chennai, India

**12th**, RAN Public School (2021 - 2022)

Percentage: 90%, Bilaspur, Uttar Pradesh

## Skills

---

### Technical Skills

**Tech Stack:** Flutter, UI/UX Design, API Integration, State Management (Provider, BLoC, Riverpod), Cross-Platform Development

**Languages:** Dart, Java, C++, Python

**Tools:** Git, Figma, Firebase, Supabase, Isar, Hive, SQLite, Flutter SDK, REST APIs, Postman

## Experience

---

**App Developer (Flutter)**, Team 1.618 (Oct 2023 - Present)

SRMIST, Chennai

1. Led development of Car Instrumentation Clusterization app, improving UI/UX and optimizing performance.
2. Designed and collaborated on the club's official app using Flutter and Figma, ensuring a smooth user experience.
3. Enhanced multiple car models in Figma, refining visual appeal and interaction design.
4. Researched and integrated advanced Flutter SDK tools, improving functionality and performance.
5. Developed and maintained reusable components for improved efficiency and scalability.
6. Collaborated with cross-functional teams to brainstorm innovative features and improve app usability.

## Projects

---

**Panchayat** (Minimal Chat Application)

A minimalistic chat application providing exclusive chat facilities for registered users, using Firebase. Includes real-time messaging and secure authentication mechanisms.

**Zwiggy** (Food Delivery App)

A minimalistic food delivery app with Firebase backend, following UI/UX principles and real-time updates. Features include order tracking, dynamic menu updates, and secure transactions.

**Vibin'** (Social Media App)

A social platform prototype using BLoC state management, implementing core social media functionalities such as posting, commenting, and notifications.
