🧩 Portfolio

Software engineer with about fourteen years of experience in coding, testing, improving, and establishing systems. I have contributed to enterprise and large projects using C#, .Net, SQL Server and so on.

I've been experienced with different tools, and I'm interested in creating scalable architecture for enterprise solutions like **microservices** and **spark** engine for large-scale data processing and deploy them on **kubernetes** cluster.

Some of my works are at my medium and github.

🧠 Skills

Backend: Dot Net - C# - VB.Net - EF Core - Rest API - MVC - WCF - LINQ - JWT - Signal R - Windows Application - ADO.Net - Identity Server - Asynchronous Programming

Database: SQL Server (Performance & Tuning, Always On, Partitioning, SSIS, SSAS, Power BI) - Redis - Cassandra - ELK - EFK - Mongo

Frontend: HTML - CSS - JQuery - JavaScript - TypeScript - Bootstrap

Testing: xUnit

DevOps: Docker - GitLab CI/CD - Kubernetes

Security: Iptables (ufw), pfSense, Fail2ban, OS Hardening with Ansible & Performance Tuning, Audit Tools

Common Services: Nginx, HAProxy, Keepalived, RabbitMQ, Kafka, Traefik

Observability: ELK, Prometheus, Loki, Grafana

OS: Windows, Ubuntu

Design Methodology And Architecture: OOP - SOLID - CQRS - Design Pattern - N-Tier Architecture - Onion Architecture - Domain Driven Design - Clean Architecture - MicroService

Tools & IDE: Visual Studio - Git - StimulSoft - Microsoft Office - SVN

Scrum: Agile - Redmine Task Management

Knowledge: React - Java Spring boot & Spring Data JPA with Hibernate

Other Skills: Kubernetes (On-Premise Cluster) - HA Proxy - Apache Kafka - Apache Spark(On Kubernetes) - ELK/EFK Stack - Ubuntu - Windows Server - MCSA & MCSE - CWNA

👛 Work Experience

Team Leader, Arka

2022 Jun – present | Tabriz, Iran

Used Skills: C# | .Net 6 | SQL Server | Scrum

Some of my works:

- Change some backend projects from .net framework to .net 6 and working with monitoring tools like idera sql check and redgate.
- Instructed and coached new developers.
- Creating a project based on the Duende identity server and client projects that use it for authorization and authentication.
- Creating a small solution for microservice projects and deploying them on consul-based servers.
- Working with the new technologies like docker, kubernetes, Kafka, Spark, ELK, gitlab CI/CD, Ceph, MinIO and so on that I have documented at my medium and github.

Senior Full Stack Developer, Arka

2019 May – 2022 Jun | Tabriz, Iran

Used Skills: C# | .Net Framework | SQL Server | JavaScript | Agile.

Some of my works:

- Creating a warehouse database and transferring traditional reports to it, significantly reducing their execution time and also using hangfire.

- Creating new indexes based on all reports using *SQL Sentry Plan* and also creating ETL based on SSIS technology.
- Creating a warehouse-based reporting dashboard project with SSAS tabular models technology and Power BI.
- Implementing Always On with 3 Database Nodes on Windows Server.
- Creating and working with user interfaces using html, javascript, css, JQuery.

Senior Full Stack Developer, ASD

2014 Jun – 2019 Apr | Tabriz, Iran

Used Skills: C# | .Net Framework | SQL Server | JavaScript | jQuery | CSS | HTML

Some of my works:

- Optimizing SQL Queries for the projects like ERP, Logistics, Inventory, and so on.
- Refactoring and developing using ASP.Net Web Form and Tuning the SQL Queries.
- Reducing some of reports executing time using tuning queries in SQL Server.
- Add banking payment capability to the projects.

Full Stack Developer, ASD

2012 May – 2014 May | Tabriz, Iran

Used Skills: C# | .Net Framework | SQL Server

Some of my works :

- Optimizing SQL Server Stored Procedures for projects like ERP, Logistics, Inventory and so on.
- Refactoring and developing softwares using ASP.Net Web Form.

Education

Bachelor / IT / graduated, *Payam Noor University* 

2007 – 2011 | Tabriz, Iran

Certificates

English  — *Intermediate* • **DevOps** 

Languages

English | Persian(Farsi) | Turkish(Azeri)

Interests

Playing the piano — Link
