SUMMARY OF QUALIFICATIONS

As a highly skilled flutter developer the years of experience. I have a strong track record of creating dynamic and user-friendly mobile applications. My dedication to staying updated with the latest industry trends and his commitment to delivering high-quality code make me a valuable asset to any software development team.

EDUCATION

PMAS Arid Agriculture University

2019 - 2023 | Rawalpindi, Pakistan

Bachelor of Science in Computer Science

FYP : Emotion Based Ai Chatbot

- Major GPA : 3.62/4.00

SKILLS

- > Flutter
- > State Management
- > Clean Architecture
- > CI/CD - Pipelines
- > Firebase (FCM, Crashlytics, Cloud DB)
- > Deep & Dynamic Linking
- > In-App Purchase
- > Payment Methods (PayPal, Stripe)
- > Subscriptions (Google | Apple)
- > Push Notifications
- > Project Documentation
- > JIRA | Trello | ClickUp
- > Socket.IO
- > GIT Flow
- > GetStream.io
- > Python
- > TensorFlow
- > Unit | Widget | Integration Testing

PROFESSIONAL EXPERIENCE

Flutter Developer

10/2024 - present | Lahore, Pakistan

The Digi Tech Resource Group, LLC

- Portals & Cross-Platform Mobile App Development
- State Management Proficiency: Riverpod, Bloc and Provider for seamless state management
- Enhance Navigation: Skillfully integrated Go-Route, Dynamic-Link, and Deep-Link
- Code Quality Assurance: Code quality standards through reviews and the implementation of best practices.
- Diagnose Performance issues, and fix bugs (including crashes and ANRs) to increase the functionality of the application.

Flutter Developer

08/2023 - 09/2024

AIM Digital Technologies

Islamabad, Pakistan

- Worked on integrating Google Maps, multi-language support, push notifications, native calling, AdMob, Facebook Ads, AppLovin Ads, stand-alone databases, and native services into Flutter applications.
- Implemented Getx for efficient state management in the application.
- Integrate third-party APIs and services to extend application functionality and ensure seamless user experiences.
- Collaborate with design and product teams to implement intuitive and engaging user interfaces following best practices in UI/UX design.
- Managed in-app purchases and subscriptions, integrating Admob, Facebook.

Junior Flutter Developer

Futuresol TECH

02/2023 - 07/2023

Islamabad, Pakistan

- Implemented secure chat features to enhance user interaction, leveraging technologies like Node.js, PHP, and Socket.IO [↗](#) for real-time communication.
- Maintained comprehensive feature documentation to facilitate smooth development processes and ensure clarity among team members.
- Ensure robust code quality through comprehensive testing, debugging, and adherence to coding standards.

PROJECTS

Betride Driver [↗](#)

Android and iOS

Led the integration of major features in the Driver App to enhance functionality and user experience. Implemented female driver registration and verification processes, hourly ride booking, city-to-city ride options, and delivery booking module. Focused on creating a smooth and mobile-optimized interface tailored to drivers' needs.

Betride Rider [↗](#)

Android and iOS

Worked on key feature development to improve the user experience and flexibility of the Rider App. Implemented driver selection functionality allowing users to choose between male and female drivers. Contributed to the offer increase/decrease module, and integrated ride booking types including hourly booking, city-to-city travel, and delivery services. Ensured intuitive interaction and seamless functionality across all user flows.

Defence Raya Properties [↗](#)

Android and iOS

This app enables Defence Raya property owners to efficiently manage their properties by viewing, monitoring, and paying maintenance charges directly through the platform. It includes features such as real-time account statements, service requests for technicians, and access to community SOPs. My responsibilities included developing the app, designing an intuitive user interface, and implementing key functionalities like payment integration, user authentication, and service management modules to ensure a seamless user experience.

Αποου Κουπόνια & Cashback [↗](#)

Android and iOS:

Αποου offers a range of features designed to enhance your shopping experience, including localization for multiple countries, allowing you to access relevant discounts and cashback offers specific to your region. The app integrates with various payment methods, enabling seamless cashback transfers directly to your bank account or PayPal. My tasks included developing the frontend interface, ensuring smooth navigation and payment processing.

Araby Ai [↗](#)

Android and iOS:

I contributed to the development of Araby AI, a productivity app that provides bilingual AI tools in both Arabic and English. My work focused on AI-powered features such as chatbots, content creation, and marketing solutions. Additionally, I helped improve user workflows by incorporating text-to-image generation and coding support.

Golf Trotter [↗](#)

Android and iOS:

Golf Trotter is designed to enhance your golfing experience. It allows you to seamlessly book tee times with no convenience fees, track your rounds, save favorite courses, and access detailed course information. With features like tee time itineraries and easy course bookmarking, I played a part in developing mobile-friendly interface for users, integrating features for course search, save, delete and notification.

Right Car (SAAS) [↗](#)

Android and iOS: Admin, Mechanic, Customer

I worked on Right Car, a SaaS-based platform where mechanics can register as car inspectors with an approved company. Customers can view available mechanics within a 10-meter radius on the map and request inspections. The platform features search, ticket generation, notifications, and Stripe payment integration for a seamless experience.

Dojo Expert [↗](#)

Android and iOS

DojoExpert App is for martial art schools v2 is under development. offering some basic operations like attendance tracking, members management, leads, SMS, milestones and payments management. It also offers attendance tracking with QR codes - scanner functionality is included.
