Experienced **Flutter Developer** with 5+ years in mobile and web development, including hands-on experience with Swift, Kotlin, and Laravel. Specialized in developing scalable, cross-platform applications for Android and iOS using Flutter and Dart, following Clean Architecture, Bloc, and industry best practices.

Delivered 12+ production apps across sectors like healthcare, education, and e-commerce, with a strong focus on performance, maintainability, and pixel-perfect UI. Proficient in Firebase, RESTful and GraphQL APIs, Hive, SQLite, and third-party integrations. Known for problem-solving, clean code, and delivering user-centered solutions in agile environments.

Skilled in **designing clean project architecture, modular codebases**, and reusable components for long-term scalability. Known for clean code, efficient problem-solving, and delivering user-centered solutions in agile, cross-functional teams.

Professional Experience

Moltaqa Company – Software House

04/2024 – Present | Mansoura, Egypt

Senior Flutter Developer - Full Time

- Took ownership of app architecture across multiple projects, designing and maintaining scalable, modular codebases using **Clean Architecture, Bloc**, and **multi-module structure**.
- Led improvements to the **development lifecycle**, introducing code standards, reusable components, and better Git branching workflows for team efficiency.
- Developed and launched **10+ production-level apps**.

Linkey App – Startup Project

01/2025 – 08/2025 | Remotly

Flutter Freelancer Developer

- Developed the complete cross-platform **Linkey app** using Flutter for a service marketplace startup.
- Built multi-role flows (provider/client), real-time **in-app chat** using socket io, **media uploads**, and **multilingual UI** (Arabic, English, German).

Vibers Net Startup/Product Company

12/2024 – 04/2025 | Remotly

Flutter Developer – Part Time

- Implemented advanced **video playback** with custom controls, full-screen modes, and smooth streaming experience.
- Supporting the early-stage **MVP** to help position the product for launch in the digital entertainment market.

Baianat Company - Software House

12/2023 – 03/2024 | Cairo, Egypt

Mid Level Flutter Developer – Full Time

- Developed 5 mobile apps using Flutter, Dart, and Clean Architecture — 3 apps delivered as live production apps.
- Integrated advanced features: **social login, live chat, live streaming**, and **audio streaming**.

Projects

Maghsool @Moltaqa

Multi-Vendor Laundry & Delivery Platform (3 Apps: User, Provider, Delivery)

- A cross-platform multi-role service app built with **Flutter (using flavors)** and **Laravel backend**, allowing users to order laundry services, providers to manage requests, and delivery agents to fulfill orders.

- I contributed to the **app architecture**, and development of core features as part of a collaborative team.
- The system includes **order management, real-time tracking with Google Maps**, and role-based flows.

Laundry City @Moltaqa

Laundry Booking & Delivery App

- A smart service app that allows users to **book laundry and ironing services**, track order status, and schedule pickups and deliveries.

Links: [Google Play](#) | [App Store](#)

El Fahd Story @Moltaqa

Promo Code & Offers Aggregator

- An app that helps users **browse and redeem discount codes and special offers** across a wide range of shopping categories and services.

Links: [Google Play](#) | [App Store](#)

Al-Waseet Al-Mutakamel Real Estate @Moltaqa

Property Listing Platform

- An intuitive real estate app that lets users **buy, rent, or list properties** with ease. Offers a clean, modern interface and smart filtering tools to deliver a smooth property browsing experience for all user types.

Tatmeen @Baianat

Online Medical Consultation Platform

- A healthcare consultation platform offering secure **audio/video calls, appointment booking,** and **real-time chat** between patients and medical consultants.
- Built as two separate apps (**Patient** and **Consultant**) using **Flutter flavors,** each with a role-specific interface.
- I worked with Baianat's development team, focusing on the implementation of the **appointment system** and **home interface,** including real-time updates and user-friendly access to core features.
- The app uses **Agora** for calling, and provides a rich in-app chat experience with media attachments.

All development rights to this app belong to Baianat Company.

Education

Faculty of Computers and Information Sciences - Mansoura University

Bachelor of Computer Science

09/2017 – 08/2021 | Mansoura, Egypt

Certificates

Information Technology Institute (ITI) [Aug 2019 May 2020] – Mobile Application Development (Google Flutter)

Information Technology Institute (ITI) [Sep 2020 Mar 2021] – Web Development, PHP, and Laravel Frameworks

Skills

Mobile Development:

Flutter & Dart, Cross-Platform App Development (Android & iOS), Kotlin (Android), Swift (iOS), Modular App Structure, Custom Animations, Material Design & Cupertino Widgets

API & Backend Integration:

RESTful APIs, GraphQL (if used), Postman (API Testing), Firebase (Auth, Firestore, Storage, Messaging), Cloud Functions (basic)

UI/UX & Design Collaboration:

Figma, Responsive Design, Pixel-Perfect UI Implementation

Architecture & State Management:

Clean Code, SOLID Principles, Object-Oriented Programming (OOP), State Management (Bloc, RxDart), Modular Architecture

Development Tools & DevOps:

Git, GitHub, GitLab, Android Studio, Xcode, VS Code, CI/CD (basic pipelines)

Collaboration & Agile:

Agile Methodologies, Scrum, Jira, Code Reviews, Product Manager Collaboration, Cross-functional Teamwork

Soft Skills

Strong Debugging, Problem Solving, Communication, Team Collaboration, Agile Development, Continuous Learning, Responsible, Mentoring, Technical Leadership, Lead by Example

Languages

- Native Arabic

- English
