JOB ROLES, RESPONSIBILITIES & PROJECTS

GB Corp (Ghabbour Auto), Egypt *Data Governance & Data Quality Manager*

Jan 2023 – present

Roles and Responsibilities:

- **Data Governance:**
 - Develop and enforce data governance policies, procedures, and standards to ensure data accuracy, consistency, and security.
 - Collaborate with cross-functional teams, data owners, and stewards to promote data governance awareness and compliance and best practices.
 - Develop a data governance strategy that aligns with an organization's goals and objectives.
- **Data Quality Assessment:**
 - Conduct thorough assessments and profiling of data sources to identify data quality issues, anomalies, and inconsistencies.
 - Define and maintain data quality metrics and KPIs.
- **Data Cleansing and Enhancement:**
 - Develop and implement data cleansing procedures to rectify data inaccuracies, duplications, and missing information.
 - Explore opportunities for data enrichment and collaborate with external data providers.
- **Root Cause Analysis:**
 - Investigate data quality issues and governance breaches to determine root causes and implement corrective actions.
 - Collaborate with relevant teams to prevent recurrence.
 - Reviewing information technology systems to ensure that data is being governed and managed correctly and enforce data quality standards.
- **Data Monitoring and Reporting:**
 - Implement data monitoring processes to continuously track data quality and governance compliance.
 - Generate and maintain data quality reports and dashboards for stakeholders.
- **Data Documentation:**
 - Maintain comprehensive documentation of data governance policies, data quality rules, and procedures.
 - Create and update data dictionaries and metadata repositories.
 - Understand business requirements, translating them into actionable specifications including how data should be governed.
- **Data Compliance:**
 - Ensure compliance with data regulations (e.g., GDPR, HIPAA) and industry standards.
 - Assist in the development and maintenance of data compliance frameworks.
- **Data Training and Communication:**
 - Provide training and support to teams on data governance and data quality best practices.
 - Facilitate effective communication regarding data governance and quality initiatives.

Qualifications:

- Strong proficiency in data analysis tools, data management, and quality software (e.g. Power BI, Informatica, Collibra, Ovalede, etc.)
- In-depth knowledge of data governance principles, policies, and practices and familiarity with data compliance regulations and industry standards.
- Strong problem-solving and analytical skills, with the ability to identify and resolve complex data quality issues and work collaboratively with different stakeholders.

- Experience developing and managing data quality rules, executing and managing data quality checks, developing reporting and controls, and resolving data quality issues.
- Strong understanding of data modeling, ETL, data warehouse concepts, database systems, and data integration techniques.
- Familiarity with programming languages (e.g., SQL, Python).
- Strong leadership and mentoring skills and excellent communication and interpersonal skills.
- Ability to assess the current processes, identify improvement areas, and suggest technology solutions.

Projects:

- Implementation of Informatica's Intelligent Data Management Cloud Solution (In Process).
- Developed Power BI Dashboards to Monitor Data Quality Scores.
- Continued Enhancements for our custom-made Oracle module "Items Transactions Module".

GB Corp (Ghabbour Auto), Egypt *Master Data Management Section Head & Data Product Manager*

Dec 2020 – present

Roles and Responsibilities:

- **Stakeholder Management:**
 - Collaborate with internal teams, including data scientists, engineers, and business analysts, to understand data-related needs and requirements.
- **Product Development:**
 - Write product requirements documents (PRDs) and initiative pitches and oversee the end-to-end development process of data products, collaborating with technical teams to ensure timely and high-quality delivery. Provide guidance on data architecture, data pipelines, data modeling, and data quality assurance.
- **Product Roadmap:**
 - Prioritise initiatives and create a product roadmap that outlines the planned features, functionalities, and milestones.
- **Product Launch and Iteration:**
 - Coordinate the product launch, ensuring effective communication, training, and support for internal teams and customers. Measure product performance, gather user feedback, and iterate on the product to drive continuous improvement.
- **Performance Measurement:**
 - Define metrics to track the success and impact of data products. Generate reports to assess product performance against defined goals.
- **Strategic Direction:**
 - Work with the VPs of Product to define the strategic direction for data products, considering market needs, customer requirements, and business goals.

Projects:

- *Implementation of Custom Oracle Module "Items Transactions Module" as a Product MDM Gate for all Product Related Requests (Creation, Update, etc.)*
- *Data Cleansing and Governance Project for the whole organization's historical Items/Products.*

Ibnsina Pharma, Egypt *Digital Transformation Lead*

Jul 2019 – Dec 2020

Projects:

- *Implementation of Enterprise Data Hub.*
- *Implementation of Pharmacy Management System.*

- *Implementation of Temperature Monitoring System.*
- *Implementation of Ibnsina Pharma Mobile Application, Web Portal, and New Website.*
- *Network and Security Vulnerability Assessment.*
- *Implementation and Migrating from IBM Lotus Notes (Domino) to Microsoft (Office 365, Exchange, Teams, etc., Projects Online, Planner, etc.).*

Asgatech Projects, Egypt
Software Project Manager
