SKILLS

Go

Around 3 years working with Go and using lots of frameworks and libraries in different scales. Also, I have some experiences in other languages like PHP and JS and interested to learn scalable languages like Rust and Java

Databases

I have experience working with MongoDB and MySQL. Also, I am interested in using Cassandra/Scylla and in-memory databases like Redis

Architecture

I have some experience in Microservice architecture. Also interested in working on other architectures like SaaS or EDA

Cloud Services

I have some experience in some services of Azure and Google Cloud

Message Brokers

I am conversant with RabbitMQ but I like to use other streaming frameworks like Kafka or Nats in large scale

Testing and TDD

I am familiar with Unit tests and Integration tests and also like to use TDD principles in the process of development

Git

I am familiar with Git and GitFlow

Docker

I know the basics of Docker but need to work deeper and learn more tools like k8s

Agile

Experienced in working as a teammate in the agile team by scrum method

Other

I am familiar with OOP, FP, SOLID, Clean principles, Rest, Grpc, and Socket

PROFILE

Experienced in producing software products in different scales. Interested in learning and researching new concepts and technologies such as data science, blockchain and AI. Eager to work in an active growing team. Flexible in teamwork and fully responsible for performing tasks.

PROFESSIONAL EXPERIENCE

Back-End Developer, Sensifai

04/2023 - present

In this position, I gained a lot of experience in blockchain services and technologies. I worked with smart contracts and some blockchain standards on different chains like ETH, TON, and SOLANA.

Back-End Developer, Ramooz

10/2021 - 12/2022 | Meshhad, Iran

In Ramooz I learned how Microservices work. Also, I have lots of experience with databases and implementing cloud computing services like Azure and Google Cloud. In this position, I was responsible for developing and making reliable services for an insurance service provider

Back-End Developer, Eleman

08/2020 - 09/2021 | Mashhad, Iran

As a Back-End developer, I was engaged to implement some applications like "Chat Messaging" with SocketIO, "Warehouse and Accounting" and an "Educational Portal" for different businesses by using lots of tools and technologies.

Software Developer, Navosh

01/2020 - 08/2020 | Mashhad, Iran

In this position, I had some experience in developing POS kiosk devices and making a web-based admin panel for them. I started to learn and work with Golang and related frameworks and libraries like Iris, Gorm, and Gorilla

Software Developer, Novin Tarahan Alia

03/2018 - 09/2019 | Mashhad, Iran

As a software developer, I developed different applications for IOT-based devices such as android applications and web applications based on PHP and SQL databases.

EDUCATION

Bachelor of Electrical Engineering (B.E.E)

10/2009 - 07/2014 | Mashhad, Iran
