PROFESSIONAL SUMMARY

I am a passionate Data Analyst driven by turning raw numbers into clear, actionable insights that empower organizations to make smart, strategic decisions with confidence.

With strong expertise in data collection, cleaning, and analysis, I leverage modern tools and technologies, including Excel, SQL, and Python. I also specialize in designing interactive, visually compelling dashboards using Power BI and Tableau that bring data to life.

What truly sets me apart is my ability to uncover hidden patterns and emerging trends within complex datasets, then translate them into clear, impactful reports that directly support decision-makers. I am continuously committed to sharpening my skills and staying ahead of the latest advancements in data analytics, always focused on delivering practical, high-value, data-driven solutions.

SKILLS

Data Analysis: Proficient in Excel, SQL, and Power BI for analyzing and visualizing data.

Programming: Python (for data analysis).

Databases: MySQL, SQL Server.

Data Visualization Tools: Power BI, Tableau.

Project Management: Experience with Jira, and Trello for managing tasks and projects.

Problem Solving: Ability to handle large datasets, analyze them effectively, and derive actionable insights. [↗](#)

Communication: Ability to present data findings and reports to teams.

Critical Thinking: Strong analytical and problem-solving abilities.

PROFESSIONAL EXPERIENCE

Egyptian police forces, Data Analyst

01/2025 – 03/2026 | New Cairo

- Managed and analyzed payroll and financial data for 5,000+ employees using Excel and SQL Server, ensuring 100% accuracy, regulatory compliance, and on-time processing across departments.
- Reduced payroll errors by 15% and payment discrepancies by 98% through process improvements and automated data validation tools.
- Developed dynamic dashboards and standardized reporting templates, enhancing the clarity and accessibility of key financial metrics for stakeholders.
- Decreased report preparation time by 20%, enabling faster insights and improving decision-making for department heads.

EDUCATION

Bachelor's degree in Management Information Systems,

2020 – 2024 | Cairo, Egypt

Modern Academy For Computer Science & Management Technology [↗](#)

PROJECTS

Bike Buyers Analysis [↗](#)

- Analyzed data from 1,246 customers to identify the impact of age, gender, and income on bike purchasing decisions.
- Cleaned and processed data in Excel, creating a pivot table to summarize purchasing behaviors across 3 key customer segments.
- Developed visualizations highlighting key trends and insights, improving stakeholder understanding of customer preferences by 30% and aligning marketing strategies.
- Designed an interactive dashboard with 10+ metrics, enabling the company to target key customer segments and increase marketing efficiency.
