🪪 SUMMARY

Software development manager with over 20 years of experience, successful as a leader, team player, and as an individual freelancer.

🎓 EDUCATION

Bachelor of Science in Computer Engineering,
American University
1998 – 2002 | Sharjah, UAE

💼 PROFESSIONAL EXPERIENCE

Oracle Corporation

CPQ Solution Architecture Manager
Nov 2022 – present | Rocklin, USA
- Managed the team that acts as a consulting team for the CPQ development teams in Oracle
- Defined and enforced development standards using the agile development process
- Worked closely with stakeholders and product owners to understand requirements and plan the user experience and architecture of the application.

Development Manager
Aug 2021 – Nov 2022 | Rocklin
- Managed agile development of Oracle's hardware and software product selection tool from requirements gathering, architecture, development, user acceptance testing and go live.
- Directed the design and development of CPQ configuration models for the new software subscription business model initiative.

Lead CPQ Developer/Architect
Jan 2017 – Jul 2021 | Rocklin
- Architected, developed and maintained system used to configure and sell Oracle's software, hardware and cloud services. Migrated sales system from an antiquated internal system to the same Oracle Configure, Price Quote (CPQ) Cloud service used by Oracle's customers.
- Developed internal applications and browser extensions to perform data analysis and validation using vanilla JavaScript, React JS, and Angular JS frameworks.
- Played key role in building the team development processes and onboarding the team to the corporate SAFe agile initiative.
- Advocated to use and afterwards lead the effort to integrate GIT source management to the Oracle CPQ configuration moving the team closer to CI/CD.

Freelance, *E-Commerce Consultant*
2019 – present
- Built the e-commerce site for the Advance Engineering Institute using Drupal CMS
- Automated course subscriptions and provided solutions for secure online training materials like videos, ebooks and practice tests.
- Administered the marketing campaigns and improved search Engine optimization (SEO).

University of California, *Application Developer*
2007 – 2016 | Davis
- Developed various division web applications using middleware frameworks like Java with Spring Framework and Ruby on Rails, and various front-end libraries like AngularJS and BackboneJS. Projects developed:
  - Instructional Planning and Administration: Used by many departments on campus as the main interface to plan courses, schedule classes, calculate budgets, and perform all the necessary communication between the administration staff, the professors, and TAs.

- Messenger: An application that serves as the main communication hub between the IT department and the end users.
- Chekhov: A checklist application that interfaced with the division's IT service management software. This tool helped keeping track of the progress of a service ticket across multiple service personnel.
- Maintained legacy web applications built using Coldfusion.
- Used various tools for version control like Github and Bitbucket and deployment tools like Capistrano and Jenkins.
Also packaged the applications utilizing Docker and hosted them on local servers as well as web services like Amazon AWS and Microsoft Azure.

Computer Sciences Corp., *Technical Analyst*

2004 – 2007 | Montreal, Canada

- Administered company database including tuning, backup, and upgrade.
- Supported Dupont and Invista employees by troubleshooting software and hardware problems. Software included Microsoft Office Suite, SAP, and Lotus Notes.
- Administered user accounts on Active Directory, Lotus Notes, Mainframe, and SAP.
- Participated in the development of the documentation intended for end-users.

i-Soft Emirates L.L.C, *Database/System Admin*

2001 – 2003 | Abu Dhabi, UAE

- Administered and maintained the company's ORACLE 8i and 9i development databases. Duties included database building, tuning, backup and recovery.
- Installed ORACLE Application server in several client sites, and configured it to run forms and reports built by the development team.
- Was in charge of version control of the company source code using ORACLE Repository and Microsoft Visual SourceSafe (VSS).
- Deployed the company software in several client sites:
  - Zayed Hospital Portal, Abu Dhabi, UAE
  - Abu Dhabi Municipality, Abu Dhabi, UAE
  - General Head Quarters Web Portal, Abu Dhabi, UAE
- Maintained and administered the i-Soft network composed of 70 PCs and 25 production and development servers.

🧠 SKILLS

Programming Languages   ● ● ● ● ●
JavaScript (jQuery, AngularJS, React), Java, RoR, PHP, Coldfusion, C#

Database   ● ● ● ● ○
MySQL/MariaDB, PostgreSQL, Firebase, Supabase

Web services   ● ● ● ● ○
Oracle CPQ, Amazon Web Services, Docker, Jenkins

Platforms   ● ● ● ● ●
Linux, Mac, Windows
