PROFILE

Completed my graduation in **Computer Science and Engineering** with experience in Full-Stack Web application development, Data Analysis and Information System Design. I think myself as an entrepreneur, have a website name **BankpediaBD** ✎ , developed in **MERN-Stack**. I have developed many web applications with HTML, CSS, JavaScript, php and MySQL. Apart from web application designing, my specialty is Data Analysis, and my favorite programming language is C#.

Have good concepts of OOP, Algorithms, Office365, Data Structures, Agile methodology, Analysis and Presenting Data in various ways. Another strong skill is leadership and supervision. For prototype designing I like Figma. I have also taken **IELTS** in 2015 and studied in an **Australian University** so my public speaking and communication skills are pretty good.

I have completed my **Internship** on **Human Resources** at **RoboAdda.** I have also worked as a **Trainer (Website Designing)** and **CAP (IT)** at **Bijoy IT & Co.**

Currently, I am working at the largest Electrical and Electronics manufacturer Company in Bangladesh, **Walton Hi-Tech Industries PLC.** as **Deputy Assistant Director;** position is **National Sales Analyst** & **Associate to the Honourable HOD of Sales (Walton Distributor Network).**
