Self-employed software developer

PROJECTS

Billiger Mietwagen + Carigami Landingpages, FLOYT Mobility GmbH [↗](#)

Sep 2022 – Jul 2023

Senior Front-End-Developer

Rewrite of the existing landing pages (Symfony PHP, React 16) for billiger-mietwagen.de and carigami.fr to a modern architecture with integration of a Headless CMS. As part of the conversion, not only were old functionalities replicated, but improvements were also made in several key areas (performance, maintainability).

Tools: Next.js 13, React 18, TypeScript, Redux, GitLab, Contentful CMS, Terraform, AWS (CloudFront, CloudWatch), FSD (Feature-Sliced Design), Monorepo

Alphabet.com, TRACK GmbH [↗](#)

Apr 2022 – Aug 2022

Senior Front-End-Developer

International relaunch of alphabet.com, division of the BMW Group, provides solution for commercial vehicle management. The task included the development of frontend / React components, with connection to a headless CMS.

Tools: React 18, Next.js 12, CSS (Atomic Design, Emotion), Storybook, Figma, GitLab, Drupal CMS

BioVerlag / Schrot & Korn, Yours Truly GmbH

Mar 2022 – Apr 2022

Freelance Software Developer

Development of frontend components for Bio Verlag, namely the online version of the customer magazine "Schrot & Korn" schrotundkorn.de

Tools: CSS (Atomic Design), Craft CMS, Twig, PHP

Competency Management Software, conlexia consulting GmbH

Dec 2020 – Dec 2021

FullStack software developer

Rewrite to current React version + TypeScript. Conversion of REST API to GraphQL. Split monolith application into separate backend and frontend applications. Installation of license manager / billing feature for end customers.

Tools: Node.js, MongoDB, React, TypeScript, GraphQL, TailwindCSS.

brandung GmbH & Co. KG

Mar 2020 – Aug 2021

Frontend-Developer

Working as a frontend developer in an agile team for various projects in the fitness and consumer area. Clients include McFit, John Reed Fitness, High5, Ferrero, Overkill

Tools: React, CSS, Storybook, Next.js, GitLab

Hyundai IONIQ 5, IBM iX

Nov 2020 – May 2021

Senior Frontend Developer

For the upcoming international launch of the new electric vehicle IONIQ 5 in the year 2021, Hyundai planned a special website with information and the possibility for test drives and pre-orders.

In addition to the visual and functional development, my tasks included ensuring the accessibility of the pages for different countries and markets.

Tools: HTML, CSS, JavaScript, CMS, CI

shucle AG

Sep 2008 – Mar 2019

Lead Software Developer

Development of decentralized search engine.

Responsible for backend, frontend, administration / operation of servers, as well as development mobile app (React Native, iOS).

Communication with board of directors to implement new features.

Tools: Node.js, MongoDB, Redis, React.

PHR, Future Systems Projects GmbH

Apr 2014 – Dec 2018

Lead Software Developer

Creation and implementation of software for competence development of employees in the field of HR.

Based on mathematical models, actual conditions and forecasts for companies are determined with the acquired data. Activity included design of the application, development backend, frontend as well as server administration.

Tools: Node.js, MongoDB, Redis, Docker, REST, React, Redux, D3.js.

Tekore Adsolutions GmbH

Feb 2003 – Dec 2004

Co-Founder / Managing Director / Software Developer

Design and development of an AdServer based on WebObjects.

Setup and colocation/hosting of the servers in the data center in Berlin.

Tools: WebObjects, Server
