PROFILE

12 + years of IT experience working as a Senior .NET Developer, Senior Software Engineer, Software Engineer & Programmer.

Experience and knowledge in developing websites using ASP.Net, ASP.Net Core, HTML, CSS, JavaScript, React, XML, Microsoft .Net framework, C#, Ef Core, ADO.Net, MS-SQL Server Web Services, Win Forms, and Reporting Services, Restful API, 3-Tire and N-Tire Architecture, LINQ, WCF, WPF, SOAP, JSON. Experience in developing web pages using the Page Life Cycle.

Interested in teamwork and software development methodologies and challenging tasks. I try to stay on the edge of technology and I like to learn new technologies.

PROFESSIONAL EXPERIENCE

Senior .NET Developer

Hamrahe Aval (MCI)

08/2023 – 03/2024

Tehran, Iran

- . Worked in an Agile team of .NET developers for a fast-paced software development firm.

Implemented an HLS management system web application for converting videos to HLS to put them on the VOD learning system website of the company using ASP.NET Core 8, C#, Microservices, Rabbit MQ, and Redis.

- . Worked on an FTP uploader system to automatically upload videos from the local server and send them to HLS servers for conversion. Improved project completion speed by 45% in 5 weeks.

- . Developed and maintained the company's online education and learning system, delivering HLS videos through the HLS management system.

Technologies: C#, ASP.NET MVC, ASP.NET Core, RESTful API, Swagger, SQL Server, Dapper, Entity Framework(Core), Microservices, RabbitMQ, JavaScript

Senior .NET Developer

Magfa

04/2019 – 07/2023

Tehran, Iran

- . Advise and collaborate with other technical team members and provide technical solutions and operational

reporting to operational staff to support process requirements, increasing operational efficiency by 30%.

- . Refactored legacy apps to make the big monoliths a testable system.

- . Development of a web GIS system to improve the accuracy of GPS measurements by up to 40%.

- . Implemented a program to collect data from satellites on mobile phones for 100% data integration.

Technologies: C#, ASP.NET MVC, ASP.NET Core, RESTful API, Swagger, JavaScript, SQL Server, Dapper, Entity Framework(Core), Microservices, RabbitMQ, MQTT Protocol, Stimulsoft, xUnit, Scrum, React, TypeScript

Front-end developer

Huemer group (part time - Remote)

01/2023 – 06/2023

Austria

- React developer
- Designed and developed UI components library for the development team, using technologies such as React , Redux , GraphQL and REST APIs

Senior .NET Developer

Society of Surveyors of Iran(part time - Remote)

03/2022 – 04/2023

Tehran, Iran

- Redesigned legacy systems, reducing costs by approximately 40% and increasing efficiency.
- Improved and optimized system performance reduced the response time of reports from an average of 30s to 5s.

Technologies: C#, ASP.NET MVC, ASP.NET Core, RESTful API, JavaScript, SQL Server, Entity Framework, XUnit, Stimulsoft, Microservices, RabbitMQ, Scrum, React

Senior .NET Developer

Tehran Municipality ICT Organization(part time - Remote) 

01/2021 – 01/2023

Tehran, Iran

- Built and published two citizenship applications that increased the speed of registering requests and employee-manager-people communication by 50%. and reduced paperwork by 40%.
- Created an address search system on the map with 2 agents. This system Boosted the search speed by 20%.
- Designing a crisis recording and evaluation system that prevents up to 30% of damages caused by delays.

Technologies:

C#, ASP.NET MVC, ASP.NET Core, RESTful API, JavaScript, SQL Server, Dapper, Entity Framework(Core), Microservices, RabbitMQ, Stimulsoft, XUnit, Scrum, React,

.NET Developer

Dadekavan Hooshmand Kimia Company

05/2013 – 03/2019

Tehran, Iran

- Built and published a custom system application that prevented approximately 30% of errors in the registration of goods and errors in calculations, saving up to 40% of the time.
- Developed more than 10 custom data-driven web applications for the company's clients.
- Developed and designed Windows applications using the .NET framework.
- Developed and designed web-based systems with ASP.NET.
- Designed and implemented databases related to web applications using SQL Server.
- Consulting and cooperating with other members of the technical team and providing technical and operational solutions increased the speed of projects by 40% and improved their efficiency by 50%.

Technologies: C#, ASP.NET MVC, RESTful API, jQuery, JavaScript, SQL Server, Entity Framework, NUnit, Stimulsoft

EDUCATION

Master in International Software Systems Science

Otto-Friedrich-Universität Bamberg 

04/2024

Bamberg, Germany

Master in software engineering

Azad University of Ahvaz, Iran 

01/2014 – 09/2017

Abadan, Iran

Bachelor in software engineering

Azad University of Abadan, Iran 

09/2010 – 02/2013

Abadan, Iran

SKILLS

Languages

C#, JavaScript, TypeScript

Web Technology

HTML, XML, CSS

Frameworks

.NET Framework, .NET core, React

Databases

Microsoft SQL Server

Tests

xUnit, NUnit

Tools

Git, RabbitMQ, Docker, Jira, Stimulsoft, MQTT Protocol

Agile Frameworks

Scrum

Concepts

Microservices, Design Patterns, OOP, SOLID, OOD, TDD, BDD, DDD, Clean Architecture

ORM

Entity Framework(Core), Dapper

LANGUAGES

English — Proficient

Persian — Native

Deutsch — A1-A2

INTERESTS

Sports, study and travel
